

Supplying
**EXPLORATION
MINING
CONSTRUCTION**

September, 2019

To Whom It May Concern,

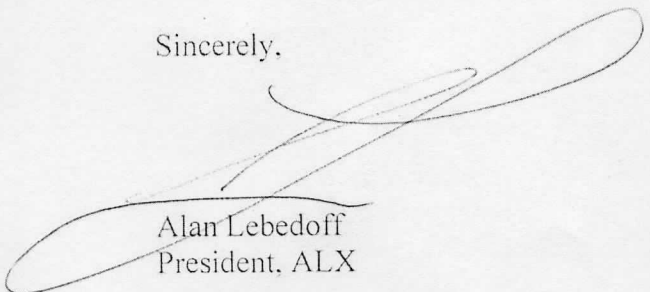

ALX Exploration and Mining Supplies (ALX) is a small business that has been operating in the City of Whitehorse since 2006. ALX primarily supplies industrial goods to the exploration, mining, and construction industries from its warehouse and office in the Mount Sima industrial subdivision.

As active members of the business community and as citizens of the City of Whitehorse, we wish to convey our support for the MacBride Museum. ALX firmly believes that the rich history of Whitehorse specifically, and Yukon more generally, should be celebrated and preserved. MacBride Museum has done an exceptional job of just that in the many years it has been operating.

We believe that the City of Whitehorse should use the financial tools available to it, including property tax policy, to support the MacBride Museum to ensure its ongoing financial stability. We understand that a change in such policy has created financial uncertainty for MacBride Museum, and we urge the City of Whitehorse to rectify this as soon as possible.

Please accept this letter as an indication of our ongoing support for MacBride Museum and the work it does to illustrate and preserve our history.

Sincerely,

Alan Lebedoff
President, ALX
